that of all the other daily papers in the

To Travelers and Residents Abroad. THE FVENING STAR will be found on file at the following places, where, a so, advertisements and subscriptions will be received: Henry F. Gillig & Co., 449 Strand. Charles cross, Loudon; Charles Hartwick, 118 Boulevard Magenta, and N. Y. Herald office, 61 Avenue de l'Opera, Paris.

city added together.

To Advertisers. Advertisers are requested to send in their announcements as early in the day as possible, and in all cases before 12 o'clock M. The insertion in the same day's issue of those reaching the office after that hour cannot be assured.

To Correspondents. Letters should be addressed to the Editorial or Business Manager of THE STAR, according to their tener, and not to any individual name. Otherwise provoking delays may occur, on account of ab-Checks, etc., should in all cases be made payable to the order of THE EVENING STAR NEWSPAPER COMPANY, -not to that of any individual. Anonymous communications not read; re-lected manuscripts not returned or preserved.

The Star for the Summer. Persons leaving the city may have THE STAR sent to their address by mail, postage prepaid, for such period of time as they may desire, at the 1212 of 15 cents per week, 80 cents per month, \$1.75 for three months, or \$3 for six months. The money to pay for the time required raust in all cases accompany the order. Other-wise the paper cannot be sent.

Cleanliness, alike on the part of individuals, households and communities, is always desirable; now it is of vital importance. There are many pert breeders in back yards and alleys. These should be stamped out. The city should be made absolutely clean from end to end. Sawers should be flooded frequently. All drains and cess pools should be disinfected, weeds should be cut and burned, and out-houses should at once be thoroughly cleaned out, well ventilated, and kept pure and sweet. ---

Our Paris correspondent corrects in another column considerable existing misapprehension as to the different features in the American display at the Paris Exposition, and shows that in extent and character it is more than qual to that of a majority of competing nations. His statements and predictions are fully verified, we take leave to add, by the awards of the several juries. In short, there is no disputing the fact that while the American contributions are by no means what they . might and ought to have been, they are nevertheless in every way creditable, and take their full share of prizes.

The inevitable has come. Kearney, the lip laboring man, now takes up his little collection regularly at the close of each of his harangues. Smart Kearney! Thirty to sixty dollars a night beats driving a dray in San Francisco all to pieces. Whether the cause of the workingmen, who contribute these sums, is benefited or not, is another thing, and one that concerns him very little.

The democrats confidently claim that they will this fall gain two congressional districts which are now republican, viz: the one in New Jersey, where ex-Secretary Robeson expects to run, and that one in Indiana, where Orth has been nominated. Under all the circumstances, the claim does not seem to be extravagant.

Now comes the contradiction of the report that Tunis, while rumors of French occupation are in the air, has made arrangements with Italy for a protectorate by that power. The government of Tunis with the prospect before it of yielding its sovereignty to some foreign power is even to be denied the poor privilege of choosing its executioner. It is not improbable that the establishment of an Italian protectorate over Tunis would come into collision with some secret arrangement of the arbiters of Europe who have, it is thought, determined to otherwise dispose of her. It will be noticed that all the powers, in one way or another, take kindly to the policy of "pro-

According to the resume of last week's trade 14 New York, published in yesterday's Herald, t e general business of the city was excellent. and the prospects for the future are decidedly

Theodore Thomas has accepted the directorstip of a musical college, about to be estabtished in Cincinnati. This is a good thing for the institution in question; but if we are to have no more Thomas concerts in future we are sorry for it. And, by the way, it is an open question whether Mr. T. could not do more for the general advancement of music in this country by continuing his entertainments than by the course he proposes to take.

The Paris society for eating horse-meat as a regular diet should emigrate from France to Russia. The former country has less than three million horses, and the number is constantly decreasing, while Russia is happy in the possession of 21,570,000. The United States is credited with 9,500,000, and England with 2,255,000. Germany and Austro-Hungary do not differ widely in their horse supply, the former having 3,352,000 and the latter 3,500,000. It is evident that enough for all ordinary purposes will remain in the world for some time yet, however diligent the hippophagists may be in using them for food.

Charles Reade will take notice that since he wrote "Hard Cash" there has been some slight improvement in the facility with which a sane person can get out of an insane asylum, though it does not seem to be much more difficult to put one in. The recent experience of Captain Holm, of Malden, shows the change, which is by no means so decided as it should be. The captain would spend his own money as he pleased, and quite frequently did not talk as much as his family expected at the breakfast table, so his wife and son obtained two doctors to certify to his insanity and put him in a mad house. And it took a decree of the supreme court of Massachusetts to get him out again, after he had enjoyed a week of life in the in sane asylum. Captain Holm is to be congratulated that he obtained his freedom at all.

The Mahometans have been led to believe that those who die in battle against the infidels go straight to paradise. It must be extremely discouraging to them to learn from a priest in the mosque at Medina, to whom Mahomet recently appeared, that only seven Mussulmans have reached eternal bliss since the prophet arrived in paradise. Yet the priest says that Mahomet says that such is the

A peace congress is now in session at Paris. There will soon be a number of bull fights in the same city. Paris is determined to gratify

all tastes this summer. The efforts to reduce the disproportion be tween the number of eggs which a hen can lay and the number which can be hatched continue without abatement. We have already mentioned the American invention which enables a single nen of steady sedentary habits to hatch out all the eggs of a hen-house. But this requires the undivided attention of the hen selected as a victim, and the unfortunate fowl is deprived of all the pleasures of life. It is proposed to do away with hen labor in the matter entirely, and to hatch the eggs artificially. The many attempts of the past in this direction have not met with brilliant success; but it is announced that all difficulties are now overcome. Chests are made in Dresden, heated with a smokeless petroleum lamp, in which seventy-two eggs can be placed and successfully hatched by means of glass tubes passing over them, through which warm water circulates. As a hen can lay bet veen one hundred and a hundred and fifty eggs in a year, and can hatch only about thirty, the success of plans for artificial incubation is not unim-
